LCD INVERTER BOARDS (PCBS)

(*always check the number off the old PCB as some models may use different PCBs inside them*)

INVERTER BOARDS (PCBs)

GO Company has introduced a range of INVERTER BOARDS (PCBs) to make it possible to repair an LCD PANEL at a cost which is lower than the replacement of the whole panel, or where the original inverter is not available or no longer available or even beyond economical repair.

GO Company is still working on our complete list of Inverter Boards. This is our list of Inverter Boards that we currently stock. Other unlisted Inverter Boards are available from Eldor with a lead time of 3-4weeks. If we currently do not list the Inverter Board that you require, please email us the part number listed on the original Inverter Board and we will advise you the price.

GO Company works very closely with Eldor an Italian company which manufacturers many high quality original replacement Inverter Boards like: AUO, DARFON, CMO, LG, SAMSUNG etc

Eldor produces many Original Inverter Boards for LCD TV panels, like: AU Optronics, BEKO, CMO, GRUNDIG, LG, PHILIPS, SAMSUNG, SANYO, VESTEL etc...

It is very easy to recognise the original inverter code because it is usually printed on a label on the PCB as shown below:

Inverter label with code
