**CCF LAMP FOR TFT-LCD MONITORS.**

Cold Cathode Fluorescent Lamp for repair for 15" TFT-LCD monitors. Diameter 2.6mm and 320mm length inclusive harness set and 2 silicon caps for isolation. The harness set is not mounted to be more flexible in case of installation. The life time is approximately 15,000 hours. To drive this kind of lamp it's necessary to use an inverter. For repair by TFT-LCD monitors normally the original inverter can be used. Otherwise please use our TV-INVCCF122C. Attention by use this device the output voltage is between 1200 and 1800Vrms 32-48kHz.

**INVERTER FOR 2CCF LAMPS.**

The inverter INV-CCF122C for CCF Lamps can drive two lamps with a maximum length of 400mm. The input voltage is 12Vdc and by drive two lamps the input current is approximately 750mA. The output voltage is maximum 1800Vrms for ignition and between 800Vrms and 1200Vrms ( depends on lamp type ) drive voltage. Attention depending on the high voltage the inverter can produce it is very important to mount them so that nobody can touch the area where the lamp connectors are, because there is the high voltage.
