4WAY AUDIO VIDEO SWITCH BOX + AUTOMATIC AND MANUAL SWITCHING

This A/V selector with composite/S-video and Component is meant for A/V components.

By pressing the "MODE" button the switch can be set in auto sensing mode or manual.

A indication Led will display the setting. By pressing the "SELECT" button in manual mode, the requested input port can be selected. Also an indication Led will display select port. In auto sensing mode the switch will check if there is a signal provided on first port, if not the switch will automatically go to the second port and check etc.

This switch can pass Component signal, but only to the Component output port. The Component signal can and will not be converted to a Composite or S-Video signal, also not from Composite or S-Video to component of course. Composite signal can be converted to S-Video and S-Video can be converted to Composite.

Features:

- Auto sensing function
- Component video compatible
- YPbPr Compatible, resolution up to 1080i
- YCbCr compatible
- High isolation between different channels
- Input: 4xComposite Video

4xS-video

4xComponent Video

4xAudio Left/Right

- Output: 1xComposite Video

1xS-video

1xComponent Video

1xAudio Left/Right
